

## **ABERDEEN GATEWAY PROGRES REPORT –2011** *Hydrasun take Occupation.*

Hydrasun Ltd, an international leading provider of bespoke fluid transfer and process control solutions to the oil and gas, petrochemical, marine and defence industries, have consolidated their operations and taken occupation of a new headquarters facility at Aberdeen Gateway Business Park.

Developer Stockland Muir worked closely with Hydrasun to create a bespoke development to meet Hydrasun's exact operational requirements. Construction of the £12m facility was completed on time and on budget and Hydrasun took occupation of their new HQ in January 2011.

Hydrasun are now fully operational and are enjoying the benefits of a single site location and high specification facility. The HQ comprises a 21,440 sq ft detached office, a 71,500 sq ft bespoke production facility, inclusive of a new training centre and an extensive concrete yard.

Bob Drummond, Chief Executive Office of Hydrasun Ltd said “We are heading towards a record year and we are using this move and facility as a springboard for the new decade. It’s brilliant to be here. The investment we are making with the building and infrastructure is targeted on developing the business through existing customers but also supporting expansion through new customers and new geographies”.
